PROJECTS

Airline Seat Reservation System | *Python, Angular*

- Collaborated on the design and development of a reservation system, defining application requirements, database structure, and booking workflows.

SQLite Database Interaction Program | *Python, SQL*

- Built a team-based application to efficiently insert, update, delete, and query data while maintaining strict data integrity
- Applied database management fundamentals to streamline data storage and retrieval processes

Monty Hall Probability Tool | *Java, SQL*

- Engineered a Java-based statistical simulation tool to model the Monty Hall problem, utilizing optimized data structures to process large-scale randomized datasets. Integrated a SQL database to persistently store, analyze, and report on the generated probability outcomes

Calendar Date Application | *Angular, Java, SQL*

- Worked with team members to design application functionality, document requirements, and implement database-backed features.

ACHIEVEMENTS

- Recipient of SPMF scholarship for achievements in mathematics
- Recipient of Proven Achievers Scholarship
- Dean's List

VOLUNTEER EXPERIENCE

LONE STAR SANCTUARY FOR ANIMALS | *Assistant*

- Assisted with animal care, enclosure maintenance, and administrative support.

MIDLAND MEMORIAL HOSPITAL | *Assistant*

- Guided patients and visitors, delivered items to patient rooms, and assisted with gift shop cashier operations.
